## **PASA Membership: Company Q&A**

### **Q: How does PASA membership work for companies with multiple employees?**

A PASA membership can be held at the **company level**, allowing flexibility as your team grows or changes. The primary membership represents your organization rather than a single individual.

### **Q: What happens if an employee listed under our membership leaves the company?**

Memberships are **transferable within the company**. If an employee leaves, the membership may be reassigned to another team member at no additional cost.

### **Q: What if we hire a new employee and want to add them to PASA?**

Companies may add **additional employees at a 50% discounted rate** per additional membership, making it easy and cost-effective to include more team members.

### **Q: Do additional members receive the same benefits?**

Yes. All added members receive full PASA membership benefits, including directory listing, networking events, and access to PASA resources.

### **Q: Are PASA memberships refundable?**

No. **All PASA memberships are final sale and non-refundable**. This policy applies to all membership tiers and add-on memberships.

### **Q: Why does PASA offer company-level flexibility?**

PASA is designed to support **growing organizations and collaborative teams** while maintaining clear, consistent membership policies.

### **Q: How do we manage transfers or add team members?**

Simply contact PASA administration, and our team will assist with membership transfers, additions, or company profile updates.

If you have additional questions, I am here to help.
